- Ms. Phillis Griffith President
- Ms. Kahaya Sooklalsingh Ordinary Member

National Primary Schools Principals’ Association (NAPSPA)

- Ms. Carlene Hayes President
- Dr. Charlene Ross-Quamina Public Relations Officer

Key Issues Discussed:

Monitoring of Schools

1. The Ministry of Education (MOE) does not categorize schools as ‘underachieving’ but instead would analyze the data provided by schools to determine whether the student/s are in need of an intervention.

2. The School Based Management System is the framework used by the MOE to monitor schools.
3. Terminal examinations cannot be used to assess underachievement as it focuses only on academics and disregards the holistic development of the child.

4. The position of Head Teacher or Dean does not exist in primary schools as such the responsibility of patrolling the schools fall to Committees within the schools.

5. Schools supervisors must visit schools each school assigned to them once per month however depending on the intervention needs of the schools, supervisors may visit more frequently.

6. The average ratio of school supervisors to schools monitored are as follows:
   
   i. Secondary schools – 1:12 or 1:14 (depending on the District); and
   
   ii. Primary schools – 1:15.

7. The need for additional schools supervisors to monitor schools within the Port-of-Spain and Environs District.

8. The need for a Continuous Assessment Test like the National Test to better assess the level of performance of students and schools.

9. Some schools reported increased interactions with the parents of students since the COVID-19 measures as the meetings are online and more convenient for parents.

Causes of the Underachievement of Students/Schools

10. The differences between private schools and public schools can be found in the following areas:
    
    i. Access to adequate funding and resources;
    
    ii. Entry requirements;
    
    iii. Assessment levels and capabilities of the teachers;
    
    iv. Disparity in Parental support;
    
    v. Access to ICTs during COVID-19; and

11. The Catholic Education Board of Management (CEBM) highlighted two factors as the root causes for the underachievement within the Port-of-Spain (POS) and Environs District:
    
    i. Schools are located in designated ‘hot spot’ areas; and
    
    ii. The level of poverty of students.

12. The safety needs of the students attending schools in ‘hot spot’ areas needs to be addressed in order for the students and teachers to operate in an environment that fosters learning and development.

13. The need to relocate certain schools out of the ‘hot spot’ areas.
The Role of Teachers

14. Students in schools in ‘hot spot’ areas at times, view the teachers and the school as a safe haven from their family life.

15. Restorative justice is utilized by the MOE however additional training for teachers in this is needed.

16. Training is required for teachers who are assigned to schools located in ‘hot spot’ areas to remove any form of stereotypes that teachers may have against students and parents within the area.

Psychosocial/Psychoeducational Screening

17. The students who may be experiencing trauma can receive psychosocial or psychoeducational screening through referrals.

18. The average time period for the screening is two weeks depending on the number of received by the MOE. After screening, intervention occurs within a day or two.

19. Intervention services of the MOE include:

   i. counselling services;
   ii. family intervention;
   iii. psychoeducational assessments;
   iv. home visits;
   v. social functioning assessments;
   vi. advocacy;
   vii. parenting in education programmes and workshops; and
   viii. networking and external referrals to other agencies.

20. Due to the COVID-19, the MOE conducted interventions and screening within the Port-of-Spain and Environs District virtually; home visits or face-to-face interventions are conducted on an as-needed basis.

Special Needs Schools

21. Specialist training needs to be provided for special school educators in different disciplines to assist in teaching and rehabilitating students with diverse special needs.

22. Currently the Special School teachers do not have the skill set to implement the individualized teaching program of special needs students.

23. Additional professionals and semi-professional specialists in the following fields of special needs are required in schools:
i. occupational therapist;
ii. physiotherapist;
iii. orientation and mobility specialist; and
iv. adaptive physical education specialist.
